

90-Day E-commerce Launch Plan

A focused sequence from evidence to a controlled product launch.

WORKBOOK | WRITE DIRECTLY IN THIS PDF OR PRINT IT

Days 1-30 - Research and proof

- Choose one customer problem and product category.

- Score live demand, suppliers and margin.

- Order or validate one sample before building wide.

Days 31-60 - Build and prepare

- Build the store, product page, policies and support workflow.

- Create a small bank of useful product creative.

- Complete a test order and mobile quality check.

Days 61-90 - Launch and learn

- Run a controlled organic and/or paid test.

- Review evidence weekly: creative, conversion, support and margin.

- Kill, keep or scale based on pre-set decision rules.

FOUNDER NOTE

Evidence first. Make the smallest useful decision. Then run the next controlled test.
