

Product Validation Scorecard

Score the evidence before you spend on a sample, inventory or advertising.

WORKBOOK | WRITE DIRECTLY IN THIS PDF OR PRINT IT

Demand signals

- Search interest is stable or rising.

- Short-form creative shows real customer attention.

- The product solves a visible or recurring problem.

Economics

- Landed cost leaves room for delivery, fees and acquisition.

- The offer can support a healthy contribution margin.

- A controlled test can be run within your capital limit.

Execution risk

- Three suppliers have been compared.

- The product can be demonstrated quickly on video.

- Returns, claims and delivery expectations are manageable.

FOUNDER NOTE

Evidence first. Make the smallest useful decision. Then run the next controlled test.
